

Tạo database trong DirectAdmin

Authored by: *Thiên Trọng DAEing*

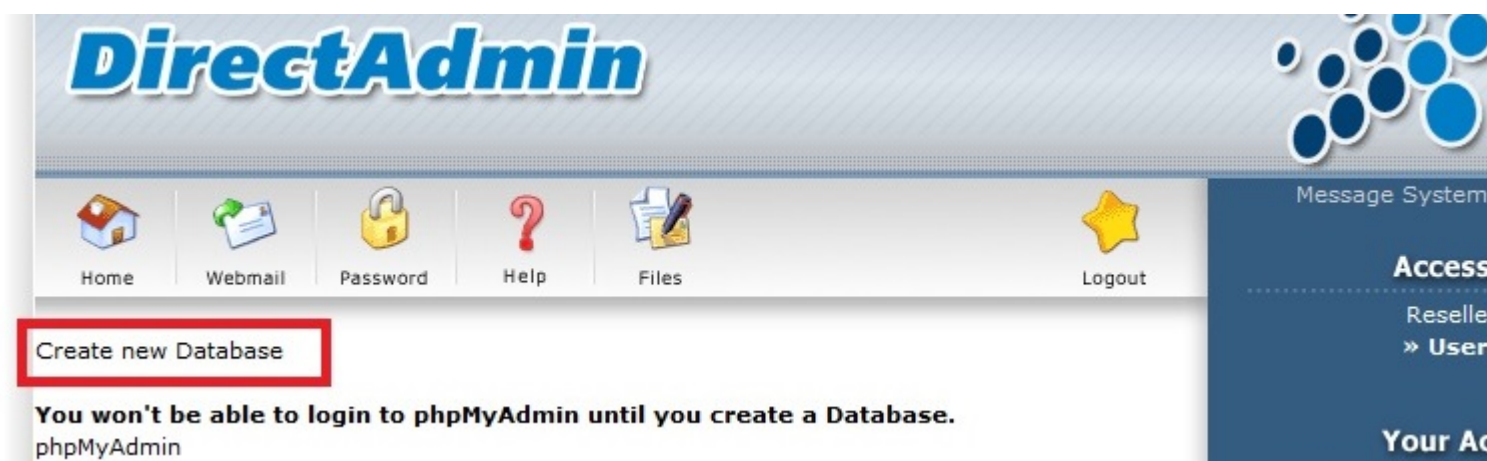

Saved From: [./article.php?id=1](#)

Sau khi đăng nhập vào DirectAdmin ta chọn MySQL Management

The screenshot shows the DirectAdmin dashboard. At the top, there's a navigation bar with icons for Home, Webmail, Password, Help, Files, and Logout. Below this is a section titled "Your Account" with a list of management options. The "MySQL Management" option is highlighted with a red rectangular box. To the right, there's a sidebar with "Message System (0)", "Access Levels" (Reseller, User), and "Your Account" statistics for Bandwidth and Disk Space.

Chọn Create new Database

This screenshot shows the DirectAdmin dashboard with the "Create new Database" link highlighted in a red rectangular box. Below the link, a message states: "You won't be able to login to phpMyAdmin until you create a Database. phpMyAdmin". The rest of the dashboard layout is consistent with the previous screenshot.

Nhập tên database, user name, và password > chọn Create

Ta nhá°-n Ä'Æ°á»£c thông tin cá»§a database ta vá» «a tá°jo.

Database Created

Details

Your database has been setup. Use the following values:

Database:	duongtt_test
Host:	localhost
Username:	duongtt_test
Password:	tdjg9BLL

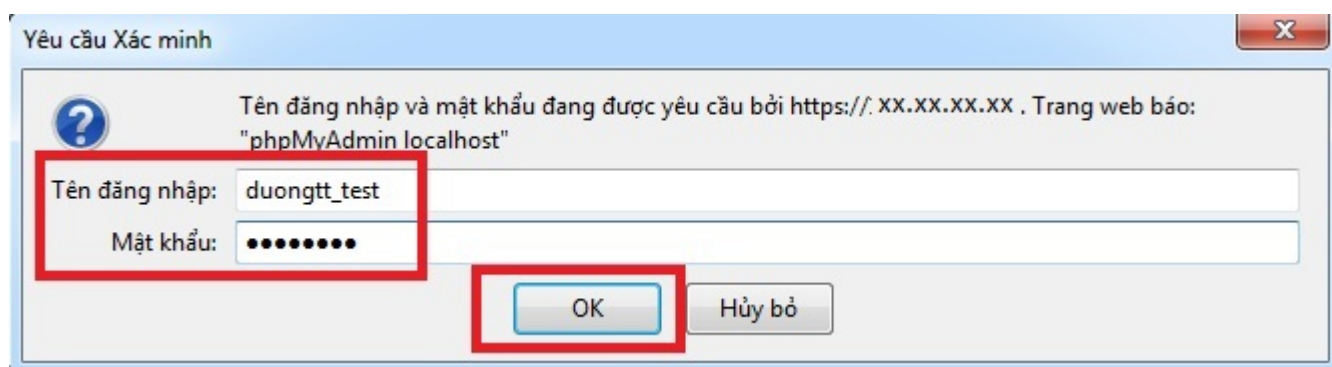

Click [HERE](#) to go back

Sau khi tá°jo database, muá»'n Ä'Ä'fng nhá°-p vào phpMyAdmin ta chá»•n phpMyAdmin.

Khi chá»•n phpMyAdmin sá°½ xuá°¥t hiá»¦n má»™t cá»-a sá°• Ä'á»f nhá°-p user name và password.

Tá°ji Ä'ây, ta nhá°-p user name và password ta Ä'ã tá°jo cùng vá»i database > chá»•n OK

Sau khi Ä'Ä'fng nhá°-p vào Ä'Æ°á»£c phpMyAdmin ta có thá»f thao tác trên database ta Ä'ã tá°jo lúc Ä'á°§u.
