

# Hướng dẫn restore cho reseller trong DirectAdmin

Authored by: **Thảo Trần Đình**

Saved From: </article.php?id=31>

Sau khi upload backup lên `/home/admin/user_backups` -> Ta chọn **"Manage User Backups"**

Chọn backup -> **"Submit"**

## Restore Backup

Step 1: From Where	Step 2: Select IP	Step 3: Select File(s)
<div><input checked="" type="radio"/> Local: <code>~/admin/user_backups/</code></div> <div><input type="radio"/> Ftp</div> <div><div>IP: <input type="text"/></div><div>Username: <input type="text" value="admin"/></div><div>Password: <input type="password" value="••••••••"/></div><div>Remote Path: <input type="text" value="/"/></div><div>Port: <input type="text" value="21"/></div><div>Update Files</div></div>	<div><input checked="" type="radio"/> Use the IP stored in the backup</div> <div><input type="radio"/> Use the IP from the list:</div> <div><div>103.3.244.68 - Shared - Server</div></div> <div><p>* Note that you must set the IP to be shared if you want to add multiple users to it. If you select a non-shared IP, you can only restore 1 user to it.</p><p>* If the user already exists, this setting will have no effect.</p></div>	<div>Location: <code>/home/admin/user_backups/</code></div> <div><div>File</div><div>duongtt.tar.gz</div></div>

Step 4

Sau khi đã thực hiện restore xong sẽ có thông báo cho ta trong **"Message System"**
